Petition 'Save the soil' – Save the soil with your signature

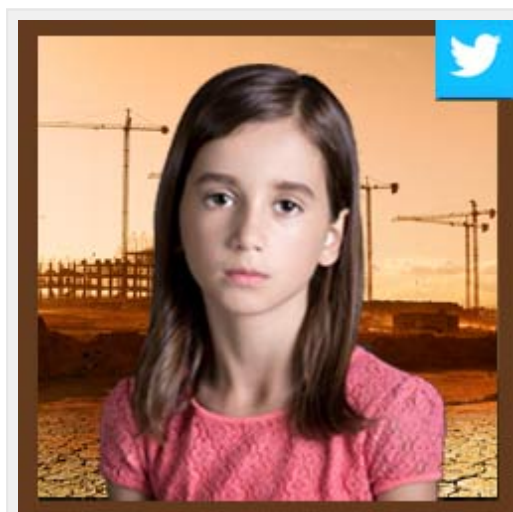

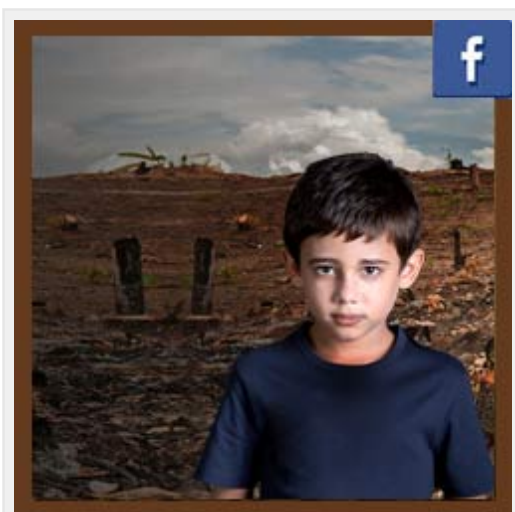

Each passing minute, the soil is assaulted, suffocated, contaminated, exploited, poisoned, mistreated, and depleted.

In Europe, there is no longer a common law that protects the soil. Safeguarding the soil with laws is the primary way of protecting people, plants, and animals. Without healthy, alive soil, there is no future. Healthy, alive soil protects us from environmental disasters, from climate change, from poisons all around.

More than **400 associations and companies** have joined together as part of the People4Soil coalition which asks the EU for specific regulations to protect the soil, which is as essential to life as water and air. Save soil with your signature.

In one year, we want to collect one million signatures in Europe.

The campaign lasts from November 2016 until October 2017.
